1. Executive Summary

Key Metrics, Critical Issues & Quick Wins

2. Audit Categories

What Works

Findings by Severity

3. Action Plan

Phased Roadmap

4. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive SEO audit of **vanto-player-site** for a **Software/App** site, generated on October 08, 2026. Findings combine technical, content, schema, performance, visual, and search-readiness evidence as available.

85/100

SEO HEALTH SCORE

Critical Issues Found:

1. **Info:** Missing OpenGraph and Twitter meta tags in root layout
2. **Info:** Missing manifest.json for PWA support

Quick Wins:

1. Add default OpenGraph configuration to buildMetadata in siteConfig
2. Add a manifest.json file

2. Audit Categories

2.1 Technical SEO

Score: 90/100

What Works

- Sitemap.xml dynamically generated correctly
- Robots.txt correctly configured
- No internal 500 errors after initial fix

Findings

Missing Manifest **Low**

The site does not have a manifest.json which helps with PWA and installability.

Recommendation: Add a manifest.json to the public directory and link it.

2.2 On-Page SEO

Score: 80/100

What Works

- Metadata setup allows overriding titles and descriptions on individual pages.

Findings

Missing OpenGraph in Root **Medium**

The global layout.tsx does not set default OpenGraph and Twitter card metadata. When buildMetadata is not called, pages lack proper social sharing tags.

Recommendation: Update layout.tsx to include default OpenGraph and Twitter card configurations.

2.3 Schema / Structured Data

Score: 100/100

What Works

- Organization schema is present
 - SoftwareApplication and Offer schema are implemented correctly
 - VideoObject schema is present
 - FAQPage schema correctly reflects FAQs
-

3. Action Plan

Phase 1: Critical Fixes Week 1

- Update layout.tsx with default OpenGraph and Twitter configurations to improve social sharing.

Phase 2: High-Impact Improvements Weeks 2-3

- Add manifest.json for full PWA and Android installability.

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)
